I would like the opportunity to work for a software company revolutionizing the software industry and help push it towards further future successes. I want to gain experience in a company where my work can make a real noticeable impact on the company at large. I would like to leverage current skills in relationship management and further improve them through projects and learning from peers.

EXPERIENCE

NOVEMBER 2017 – PRESENT
RELATIONSHIP MANAGER/WEB DEVELOPMENT, CLICKSWITCH

Support and advise over 150 clients (Financial Institutions) as it relates to the ClickSWITCH application. I also help implement our product with new clients; this involves setting up their portal, integrations, and training management. I negotiate contract renewals for longer terms and at a pricing structure that is beneficial for both parties. I also write code for internal processes, i.e. data visualizations, email automation, developing the corporate website. I have done these projects using languages such as HTML, CSS, JavaScript/jQuery, Python.

MAY 2017 – NOVEMBER 2017
OPERATIONS SPECIALIST, CLICKSWITCH

Worked mainly in data entry and research. Would research and add new companies to our database (billers, depositors).

EDUCATION

MARCH 2018
FULL-STACK DEVELOPMENT, UNIVERSITY OF MINNESOTA

HTML5, CSS3, JAVASCRIPT, JQUERY, BOOTSTRAP, EXPRESS.JS, REACT.JS, NODE.JS, DATABASE THEORY, BOOKSHELF.JS, MONGODB, MYSQL, COMMAND LINE, JAVA AND GIT, AND MORE
